SUBJECT No. 812.

The Mission school at Kadaba.

Mr. Hutchaveere Gowda, Gubbi taluk.

Summary of Representation.—The Mission school is situated in the heart of the town close to a ditch. This is a very unhealthy place and has been the cause of frequent ill-health to the school children. The Mission may be addressed to shift the school to a better and healthier locality.

SUBJECT No. 813.

Anglo-Vernacular school for Kadaba.

Messrs. Hutchaveere Gowda and K. Ramanuja Iyengar, Gubbi taluk.

Summary of Representation.—Kadaba is a big village. It has got only one Mission school. The grant for the school may be slightly increased and the appointment of a Kannada and English knowing teacher capable of teaching English to the boys provided for.

A Government Anglo-Vernacular school at Kadaba is urgently needed. The taluk has not even a single Government Taluk (Anglo-Vernacular) school.

SUBJECT No. 814.

Entrusting the jaggory manufacture to the Agricultural Chemist.

Mr. Herur Gundappa, Kunigal taluk.

Summary of Representation.—The jaggory which is manufactured by the use of the sugar cane plant at Kunigal turns out to be of very inferior quality. It is therefore prayed that manufacture of jaggory may be entrusted to the Agricultural Chemist.

SUBJECT No. 815.

Improving Gubbi tank.

Mr. Madar Sab, Gubbi taluk.

Summary of Representation.—Gubbi tank is a large one having an atchkat of over Rs. 4,000. The tank has since its construction silted up 4 or 5 feet above the level of the sluice and the water in it is not therefore enough to irrigate its atchkat, and crops wither every year. Putting up turf-bund over the *kodi* as per circular orders, in November and December, is of no avail. Consequently dry crops have to be raised on over 200 acres and yet wet assessment is being paid. An extent of more than 100 acres of the atchkat is covered by the waterspread of Kadaba tank and an extent of more than 300 acres is not used for wet cultivation. The water in the tank is not enough to irrigate even the remaining lands. The Amildar after inspection arranged to supply water to all the lands by turns and still the crops withered. It is prayed that the *kodi* may therefore be raised or the level of the southern *kodi* may be raised to the level of the northern *kodi* and the 'Thorehalli Ane' built in brick masonry. The lands that cannot be irrigated after all these improvements are effected and also certain gardens below, may be assessed dry.

SUBJECT No. 816.

Improvement of the capacity of the tanks of Sira, Doddakere and Chikkakere.

Mr. Agali Venkataramaiya, Sira taluk.

Summary of Representation.—It is again urged that the water in the Sira big and small tanks is insufficient. Their bunds may be ordered to be raised.

SUBJECT No. 817.

Increase of capacity of Hal Dodderi tank.

Mr. Agali Venkataramaiya, Sira taluk.

Summary of Representation.—The water of Hal Dodderi tank in the Sira taluk is insufficient for the lands below it. It is requested that the bund may be ordered to be raised.
